

The Chester Ridley Crum Watersheds Association
and Penn State University - Brandywine present

Backyard Solutions for Healthy Streams

Lessons from Philadelphia's *Green City, Clean Waters* Program

Featured Speaker:

Maggie Dunn

Philadelphia Water Department

February 28, 2016

2:00 pm to 3:30 pm

Penn State-Brandywine
Tomezsko Building Auditorium
25 Yearsley Mill Road
Media, PA 19063

Topics Include:

- Introduction to *Green City, Clean Waters* – Philadelphia's innovative urban stormwater management plan
- How stormwater management in Philadelphia has relevance for its suburban neighbors
- What you can do to improve your local streams – a detailed look at tools you can use at home including rain gardens, rain barrels, downspout planters, permeable paving and more.

Maggie Dunn is an outreach specialist at the Trans-Pacific Engineering Corporation where she supports the Public Affairs Division of the Philadelphia Water Department. Maggie has a BA in Biology from Goucher College and a Masters in City Planning from the University of Pennsylvania. She assists in managing the Water Department's "Rain Check Program," which provides financial incentives for Philadelphia residents to install landscaping that manages stormwater. In addition, she coordinates public outreach efforts for green stormwater infrastructure projects throughout Philadelphia.
